- Next auth
- Tailwind
- Mongodb
- Mongoose
- Cloudinary
- Teamwork
- Project planning
- Strong communication
- Ability to learn quickly and adapt to new technologies

## LANGUAGES

- English (Fluent)

## ABOUT

I have been in the Frontend Development field for quite some time now and I have acquired sufficient proficiency in HTML, CSS3, PHP and jQuery. I also have experience in Frameworks, that is, React, Tailwind CSS, Next.js and Project Management, which entails full project lifecycle from concept to deployment.

## CAREER HISTORY

### Frontend Developer

- Designed and developed user interfaces and user experiences (UI/UX).
- Built responsive, interactive web applications using HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js
- Ensured cross-browser compatibility and debugged issues.
- Collaborated with designers and back-end developers to deliver high-quality solutions.

### Project Manager

- Developed and managed project plans, timelines, and budgets.
- Managed changes, risks, and issues.
- Defined project scope, goals, and deliverables.
- Tracked project progress and addressed deviations.
- Ensured project closure, documented lessons learned, and evaluated success.

### Headless CMS Developer

- Built dynamic websites and applications using Sanity.io as a content management solution.
- Integrated Sanity.io with frameworks like Next.js for seamless front-end experiences.
- Customized content schemes and GROQ queries to suit clients' needs for flexibility and scalability.

## EDUCATION

### Field Of Study

Systems Engineering, University Of Lagos
